

Custom Home Plan

This 3 bedroom, home with a total living area of 2300 sq. ft. is an innovative 1-1/2 story design. Although it is complex, it is easily accomplished with the Snap-N-Lock™ Insulated Panel. The raised-up concrete floor gives the house a prominent look, while multiple roof lines and dormers create interest. The 1-1/2 story design is an economical way to increase sq. footage, and also keep costs down. Energy efficiency, durability, low maintenance, and comfort are just a few features of the Snap-N-Lock™ Panel building system.

1) Front view of completed house. 2) Exterior side walls are erected. 3) All Roof Panels are installed and secured, gabled windows ready for finishing. 4) White siding is applied with screws directly to the Snap-N-Lock™ Panels. Soffits become unnecessary because of the clean white underside of the metal panels. 5) Close-up of floor trusses. 6) Close-up of upper-level steel interior framing and furring channels. 7) Side view of completed home.
