

3 Car Garage with Office Space Commercial Floor Plan

Structall offers a complete line of precut and preengineered garage packages utilizing structural insulated panel (SIP) technology. All packages erect quickly, are stronger than conventional framing, and are extremely energy efficient.

The high energy efficiency of Structall's patented Snap-N-Lock™ panel is due to the continuous foam interface design at the panel joint. The joint also allows for faster & easier installation - the male and female edges of the panel snap together quickly & easily.

Snap-N-Lock™ panel structures also withstand wind and storm damage better than conventionally built structures.

Snap-N-Lock™ Insulated Panel

This flex-space plan holds up to 3 cars and is ideal for a family run business or small commercial operation. Use as a machine shop, car repair garage, antique shop, or maybe a studio (craft/hobby/art).

Plans and specifications are subject to change without notice. All dimensions are approximate.
